- To keep your brows hairs nourished during your treatments it is recommended to use the brow oil.

- Do not apply Retin-A, AHA's, Glycolic acids, citric acids or exfoliates around the Brow area for the first 72 hours (minimum).
- No self-tanning, professional tanning or spray-on makeup should be applied one week prior and/or post your initial treatment for best results.
- Avoid high perfumed products for at least 24 hours after your treatment.
- Please note that oil-based makeup and makeup removers can cause the tint/dye to fade quickly.
- Exposure to the Sun/UV lights for long periods can cause the tint/dye to fade quickly.
- Please note: It is normal for some redness to appear with an eyebrow waxing treatment, especially in clients with sensitive skin; this redness will usually subside within a couple of hours (the length of time depends on the sensitivity of the individual's skin). If a reaction occurs please contact the stylist immediately or seek medical attention.
- Maintenance is key to looking after your brow investment and maintaining your best look. You should book in for brow colour and hair growth maintenance every 3 - 4 weeks and every 6 - 8 weeks for your brow lamination (depending on your Brow growth).
