

# Lash Lifting

## BEFORE YOUR APPOINTMENT

- Remove all eye makeup, contact lenses, and false eyelashes before your appointment
- Avoid curling your natural lashes for at least 24 hours prior to treatment
- Stop using waterproof mascara 48 hours before your procedure since it leaves behind unwanted residue
- Clients with an eye infection, like pink eye, need to wait until it has cleared prior to treatment

## AFTER YOUR APPOINTMENT

- Avoid excess hot water/steam/heat on lashes for the first 24 -48 hours. This includes spas, steam rooms, laser, facials, saunas, cooking over open flames, excessive hot showers. Excess heat will cause curl to either relax or tighten.
- Do not rub or play with your lashes.
- Avoid shampoo, make-up, un-approved conditioners, un-approved make up removers, creams, eye serums on the lash/eye area for 24 hours.
- Avoid mascara on your to your lashes for at least 24 hours after your treatment unless you're using our **Ellevate Lash Lift Mascara**
- Only use stylist approved products directly after treatments. We highly recommend using our **Elleebana advanced aftercare formula**. A daily treatment to maintain optimum lash lift results and lash health.
- We recommend using a Lash growth serum a couple of weeks before or during your treatments so you can achieve a more dramatic lash lift. We retail both **Long Lash and Lash Fridays** for optimal results, longer-lasting curl and healthy lashes inside and out.
- Avoid swimming for 24 hours to prevent premature loss of tint colour and relaxed curl.
- Avoid face washing products that contain oils as this can cause the curl to relax prematurely & tint will fade quickly.
- Because your lashes are still malleable (shape-shifting) when you leave your treatment please try to sleep on your back, especially for the first few days. Sleeping directly on your lashes can cause them to become misshaped.
- Once you notice your lashes starting to grow out and they become slightly untidy looking then it is time to rebook for your next lash lifting appointment.
- It is normal for you to have some tint residue appear on the bottom lash line after lash tinting treatment, more so in clients with fair skin; this will fade after a couple of washes.
- Maintenance is key to looking after your Lash Lifting investment and maintaining your best look. You should book in for Lash Lift maintenance every 5 - 7 weeks depending on your hair growth cycle and the type of lifted curl you have. The tighter the curl the more frequent you need to re-lift lashes.

**IT IS IMPORTANT TO FOLLOW THE SPECIFIC AFTERCARE INSTRUCTIONS PROVIDED TO ENSURE THE BEST POSSIBLE RESULT. IF YOU HAVE ANY QUESTIONS OR CONCERNS ABOUT THE AFTERCARE PROCESS, BE SURE TO ASK YOUR ARTIST FOR MORE GUIDANCE.**
